Bass Tubes

- Attractive, felt-covered tubular design
- Cylinder shape for optimum sonic performance
- Extended deep bass frequency response
- High sensitivity
- High power handling
- Climate proof
- IMQ Injection Molded Quartz driver cone technology
- Straps for fast, easy installation and removal

 Infinity

Infinity Kappa Series Bass Tubes

Before the arrival of the Infinity Kappa Series Bass Tubes, filling your car with rock-solid bass sounds also meant permanently sacrificing transportation flexibility. You had to fill almost all of your available baggage space with big, heavy, ugly speaker boxes, not to mention the expensive amplifiers needed to make them really go boom.

**With Infinity Kappa Series Bass Tubes,
it doesn't have to be that way anymore.**

Combining creative thinking and Infinity's advanced technological resources, Infinity now offers you bass that solves problems instead of creating them. Infinity Kappa Series Bass Tubes are flexible automotive subwoofers, sensitive enough to go deep and loud without megabuck amplification and compact enough to travel without taking up all your valuable baggage space.

**Infinity Kappa Bass Tubes
are the totally tubular solution to all your bass needs
on wheels.**

Because flexibility is a high priority with Infinity Bass Tubes, straps are provided for easy installation and removal. For those times when you need more baggage space, it's a snap to remove the Bass Tube and re-install it later in a matter of minutes.

Infinity Bass Tubes are designed to be climate-proof, to withstand the high levels of moisture, dust and vibration as well as the extreme variations in temperature which are common in the automotive environment. The powerful bass drivers employ a butyl rubber surround for long life and stability at extreme temperatures and an IMQ driver cone of Injection Molded Quartz for strength and rigidity.

The attractive, compact, felt-covered tube shape actually enhances sonic performance. Because the cabinet is shaped like a cylinder, standing waves inside the tube are eliminated. The result is clean, clear, powerful bass sounds that let you rock and roll on down the road.

Infinity Kappa Series Bass Tubes Technical Specifications

	Kappa 100BT	Kappa 120BT
Driver	10" Infinity subwoofer	12" Infinity subwoofer
Frequency Response	28 Hz - 1 kHz	25 Hz - 1 kHz
Sensitivity (1 meter/2.83V)	93 dB	94 dB
Power Handling (RMS)	200 W	250 W
Dimensions (Width x Length)	31 x 60 cm	35 x 72 cm

ON THE ROAD WITH BIGGER, BETTER BASS
