

micro II
3-Piece Speaker System

 **Infinity**

Musicality By Design

SOUND IMAGING AND DISPERSION YOU CAN LIVE WITH

Sound imaging means you can see with your mind the musical images picked up by your ears. This is a refined art with MICRO II. Superb imaging is made possible by the broadly dispersed, clean musical patterns produced from the satellites. The unique cylindrical MICRO II modules do not diffract or distort the sound waves that are generated by the drivers.

TWO-WAY MUSICALITY

MICRO II is a true 2-way hi-fi speaker system. Critical musical frequencies are produced

by a 4 1/2" polypropylene woofer mated by a protective crossover to a 1/2" polycarbonate tweeter in each satellite module. This is

far superior to most other three-piece speaker systems which rely on single satellite drivers to attempt broad range music reproduction.

A SUBWOOFER YOU CAN FEEL

The MICRO II subwoofer produces bass of true power and punch that is also musical and harmonically accurate. Dual 6.5" polypropylene woofer drivers are engineered into a tuned enclosure which multiplies driver output. Exceptional bass muscle is developed by a unique curved internal port, and then delivered to the room through the contoured MICRO II faceplate.

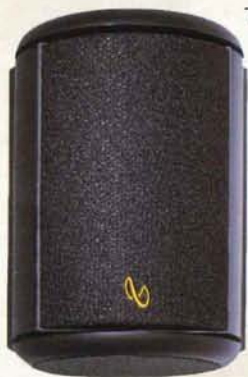

This faceplate is more than attractive design. It presents bass energy to the room as smooth wavefronts instead of the ragged boomy bass produced by other "boxes".

MICRO II Created By Infinity To Meet Your Highest Aspirations For Musicality And Design

The artistic integration of superior musicality with today's lifestyles. That's what Infinity has achieved with MICRO II. The sonic performance of MICRO II contributes dramatically to your enjoyment of virtually any music, video or multi-media program. MICRO II is designed, like free-form sculpture, to meld fluidly with virtually every listening environment. The pleasing cylindrical shape of the satellites and the smooth, curved lines of the subwoofer provide a unique appearance of high-tech elegance. MICRO II by Infinity — perhaps the only three-piece system that can simultaneously bring you visual and musical harmony.

ENDLESSLY FLEXIBLE MOUNTING OPTIONS

The MICRO II has a low-profile mounting bracket that is easily secured to walls, ceiling or video cabinetry.

The cylindrical satellite modules can be angled and pivoted in the mounting system to give you the most mounting choices and musically accurate reproduction. With the brackets removed, the padded cylinder endplates of MICRO II also permit vibration free and mar-free placement of the satellites on furniture.

SPEAKERS THAT WORK WHERE YOU LIVE AND PLAY

The Infinity MICRO II System is weather resistant and constructed of extremely durable architectural polymers. Install MICRO II indoors, outdoors, at the pool or in the family room.

VIDEO AND HOME THEATER WITHOUT COLOR DISTORTION

MICRO II satellites are magnetically shielded. This means you can place them next to a TV screen without the drastic color distortion caused by the unshielded magnets in most speakers. You can place MICRO II modules on each side of your TV monitor — or add a module as a center channel directly above the screen. Additional satellites create a dynamic home theater at remarkably modest cost.

Form. Function. Flexibility.

Yours with Infinity MICRO II...
the exceptional three-piece satellite/subwoofer system

Infinity MICRO II is the soul of a home theater surround sound system. It's a compact, high tech, high performance replacement for your old speakers. It's the perfect indoor/outdoor satellite speaker system. The MICRO II system is engineered, styled and built for superior sonic performance in all applications — with sound innovations like cylindrically-shaped satellites and the unique contoured subwoofer faceplate — and features like magnetic shielding and construction of durable architectural polymers. Versatile installation brackets allow for easy placement of the satellites on walls or ceilings, on a shelf or next to the TV mounted on elegant optional Infinity speaker stands. Enjoy MICRO II. It's clearly the best sounding, most versatile and attractively styled three-piece speaker system in its class.

INFINITY

A Quarter Century Of Sonic Excellence

In 1968, we were a small group of engineers with an absolute passion for music. We set out to create the perfect loudspeaker by applying advanced aerospace technologies and materials to the science of acoustic design. Our first product, the Servo Statik I, was the world's first hybrid 3-piece speaker system employing a servo-controlled subwoofer and two "satellites." It immediately captured the attention of audio purists. Infinity was born. We were on our way to creating an American tradition of breakthroughs in sound technologies.

Over the years, innovative approaches to design and manufacturing contributed to the appeal of our products — and to the growth

of our company. Today, we are recognized worldwide as the leader in high-performance home entertainment and automotive speaker systems. We remain true to our original mission — to reproduce music perfectly by relentlessly expanding the boundaries of acoustic science.

At INFINITY, we are also committed to making our leading-edge technologies available to everyone in search of sonic excellence and value. That's why our products range from high-performance car audio components and systems to the state-of-the-art \$60,000 IRS V. To satisfy those for whom audio and video applications are equally important, we offer the versatile new INFINITY MICRO II.

SPECIFICATIONS

SATELLITES

FREQUENCY RESPONSE:	150Hz - 25kHz
CROSSOVER FREQUENCY:	5kHz
SENSITIVITY:	90 dB @ 2.87 volts, 1 meter
NORMAL IMPEDANCE:	6 - 8 ohms
POWER RATING:	Use with amplifiers rated between 20 - 100 watts, RMS per channel
DRIVERS:	4" Polypropylene Cone Woofer 1/2" Polycarbonate Dome Tweeter with "Acoustic Lens"
CABINET FINISH:	Black or Infinity White
DIMENSIONS:	5 1/2" Diameter, 8" High (with mounting bracket)

SUBWOOFER

FREQUENCY RESPONSE:	40Hz - 150Hz
SENSITIVITY:	90 dB @ 2.87 volts, 1 meter
NOMINAL IMPEDANCE:	6 ohms
POWER RATING:	Use with amplifiers rated between 20 - 100 watts, RMS per channel
DRIVERS:	Dual 6 1/2" Polypropylene Coated Woofers
CABINET FINISH:	Black Pica
DIMENSIONS:	9 1/4" Wide, 15 1/2" High, 15 1/4" Deep

Because Infinity constantly strives to improve existing products, specifications are subject to change without notice. Infinity Micro II satellites and subwoofer carry a five year transferable Parts and Labor Warranty within the United States. Consult your authorized Infinity dealer for details.

Optional Micro Satellites and Infinity Speaker Stands available from your Dealer.
