Infinity sound from a small package

Filling a room with sound once required giant speakers that had more in common with furniture than high fidelity. Thankfully, those days have passed. As proof, we offer the Infinity Minuette. A loudspeaker whose full sound and dynamic range belie its incredibly compact size.

The Minuette is a truly versatile performer, equally impressive whether resting on a shelf or wall-mounted as part of a full surround home theater system.

The Minuette Center Channel is the centerpiece of a truly impressive home entertainment system. With its D'Appolito speaker configuration, the Center Channel provides panoramic theater sound. At the same time, it greatly enhances dialog for life-like sound.

true-to-life dialog

for fun . . .

On their own, the multi-purpose satellites are an ideal way to enhance any audio system. If you own a surround sound equipped receiver, choose the Surround Pac (two satellites and a voice-matched center channel) and you instantly turn your existing two-way system into an impressive surround system.

for music & movies

Team the Minuettes with an Infinity powered subwoofer and you've got an incredibly musical, yet surprisingly affordable system. And if a home entertainment system is your goal, you can pair the Minuette Theater Pac (four satellites and a center channel) with a subwoofer with any surround sound receiver for complete cinematic sound.

Unlike most satellite loudspeakers, the Infinity Minuette's shielded woofer and polycarbonate tweeter offer true two-way sound. The Minuette's design produces crisper, more realistic highs and clearer midrange for incredible music and soundtrack reproduction. Choose from Minuette's black finish to match high-tech AV components, or the white finish to seamlessly blend in with surrounding walls.

clearly surrounded

From the den to the dorm room, Minuette loudspeakers offer maximum performance while occupying minimal space.
