

LANSING SOUND, INC.

MODEL D 101

GENERAL PURPOSE LOUD SPEAKER

A 15 inch general purpose loud speaker with exceptionally high efficiency and wide dynamic range. It is especially suited for Public Address and music system use.

The cone frame is of cast aluminum for high rigidity and light weight. An Aluminum diaphragm fastened directly to the 3 inch voice coil tube extends the high frequency range.

The Heavy Alnico V magnet is entirely enclosed in a heavy field case to hold stray magnetic fields to a minimum. It can be used near Cathode ray or television tubes without effecting their performance.

SPECIFICATIONS

- Power Input—20 Watts
- Impedance—15 Oms
- Resonant Frequency—55 Cycles
- Outside Diameter—15-3 16"
- Depth—7 3/4"
- Field—Permanent Magnet
- Voice Coil—3" Diameter Wound with Aluminum Ribbon
- Mounting Dimensions—R. M. A. Standard
- Net Weight—29 Lbs.
