CHASSIS
HS-224
HS-250

The models listed at right with the suffix "U" use Chassis HS-224, the other models use Chassis HS-250. The circuit shown is exact for HS-250 using multiple capacitor-resistor plate. The insert diagram in the lower left hand corner shows differences in the HS-250 for a multiple capacitor plate. Chassis HS-224 uses both types of plates and differs from HS-250 in physical assembly and some circuit elements.
